

軽撃区ゆるり YURURI Wedge Target-Spin

Yururi's Forged Raw GeKKu wedges are forged from S25C steel, which provides a wonderfully soft feel. With a relatively high centre of gravity, these wedges produce a lower, more penetrating ball flight, unbelievable spin and remarkable distance control and consistency.

Numerous lofts including non-traditional ones to spice up your bag!

You also have the choice of having the YURURI logo in Japanese or English on the wedge.

KUBAN 撃+41

No More 9iron!

Piercing low ball flight with intense backspin, Kuban or number nine has the loft to replace a 9 iron and the face, grooves and sole of a wedge for confidence!

Target-Spin FP3.5-B2

PS 撃+53

Attack the flag!

A classic gap wedge loft this also allows you to take dead aim at the flag. The dynamic grind offers versatility from a variety of lies.

Pitching Sand FP4.5-B8

PW 撃+45

A strong PW!

A strong lofted PW, playable from a variety of lies. Still provides the Yururi hallmark of spin and distance control.

Pitching Wedge FP4-B3

SW 撃+57

A versatile SW!

A very versatile Sand Wedge with the ability to go in low with spin or high with a soft shot that sits down like a dog in front of the fire! Again the grind allows you to open up the face from even the tightest lie, yet it still makes bunker shots seem so easy!

Sand Wedge FP7-B12

PPS 撃+49

Deadly from 100yard!

This cross between a PW and PS is deadly from within 100yards. With perfect trajectory and backspin allowing you to precisely stop the ball on a dime!

(PW★PS) STORONG PS FP4.5-B7

ROKKO LOB 撃+61

A get out of jail club!

The Rokko Lob wedge is made to go high and stop on a dime. This is a rescue wedge for any pinch. In a rough situation this is option Number1.

Rokko Lob FP7-B5

ゆるり Tour (Professional and skilled Amateur)

The Yururi Tour head shape is the same as the YURURI wedge but the sole grind is different. This is exactly the same model supplied by YURURI for the JLPGA tour players.
